

## SENIOR MANAGER, PERMITTING AND COMPLIANCE

### ARE YOU A GOOD FIT?

**YOU** are a skilled professional, experienced in the utility scale renewable energy business, and driven to make a difference. You know how to research and understand the environmental and regulatory requirements needed to progress major wind, solar, and battery storage projects. You're accustomed to drafting permitting applications and preparing the supporting materials, working effectively and efficiently with internal and external consulting resources to meet schedules and deadlines. As our leader for this important work, you will manage the process to drive projects to approval. You will collaborate closely with your colleagues in Project Development and Engineering and report directly to our National Director, Project Development.

Your career includes 5+ years of relevant experience (e.g., energy, environmental, regulatory permitting and compliance) with at least some of that in utility scale development. You can identify appropriate consultants to execute tasks and manage relationships to achieve results. You're a quick study, able to extract critical information from reports and regulations to provide actionable recommendations. You are scrupulously honest and professional in your approach to your work. You thrive in an environment where you collaborate with colleagues who are also dynamic, committed, passionate professionals.

You're extremely well-organized, able to manage competing priorities, and respond quickly and nimbly to the changes inherent in a fast-paced environment. While often working on your own, you recognize the importance of providing regular, structured updates on your activities. You keep yourself and your coworkers on track as you move toward a common goal.

We prefer this position be based at our Chicago headquarters but will consider remote work. This role will require some travel to project sites and, if remote, time at our Chicago headquarters.

### ARE WE A GOOD FIT?

**WE** are PNE USA, Inc., a wholly owned subsidiary of PNE AG Group in Germany, one of the pioneers in developing onshore and offshore wind farms and, more recently, solar and energy storage projects. We're based in Chicago and our core team operates from our headquarters in the city's downtown area. While our activities are supported by our parent company (more than 400 employees and the financial resources of a significant publicly traded firm), we are a small team here (we like to describe ourselves as "lean and nice" – not "lean and mean!").

We take pride in our ethical and transparent approach to our business dealings and the excellent relationships we establish with customers, stakeholders, and partners. We set challenging goals and work together to craft the strategy and plans to achieve them.

We offer a competitive benefits package to full-time employees, including health, dental and life insurance, a 401k match and more.

**IS THIS OPPORTUNITY A GOOD FIT?** If so, we'd like to hear from you. Tell us about yourself!
